Key words: added value unit, sale, profitableness, costs, rapport, resources

ABSTRACT:

The analyzed main idea, which at the same time represents the very essence of the method, is the measuring of the entire activity of the enterprise with the help of a single measuring unit.

The present paper has a three-part structure, in which are presented the following:

- a short history of the method outcome
- a brief description of the method
- the advantages of applying the method
